EDUCATION

National University of Computer and Emerging Sciences (FAST-NUCES) — Lahore, Pakistan
Bachelor of Science in Computer Science; CGPA: 3.3/4.0 — *Aug 2023 – Jun 2027 (Expected)*

- Dean's List in the 1st and 6th semesters. Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Systems, Human-Computer Interaction, Android Development.

TECHNICAL SKILLS

Languages: C++, C#, TypeScript, JavaScript, Python, Luau, GLSL, SQL
Graphics & Games: Three.js, WebGL, Unity, Roblox Studio, Web Audio, OpenCV
Web, Mobile & Tools: Next.js, React, Expo, Firebase, WordPress, WooCommerce, ffmpeg, Git, Odoo ERP

EXPERIENCE

Head of AI Competition — Jan 2026 – Present
SOFTEC 2026, FAST-NUCES — *Lahore, Pakistan*

- Run the AI competition at SOFTEC, FAST-NUCES' annual tech festival: problem sets, judging criteria, tooling and contestant logistics.

Freelance Web Developer — Jun 2026
Self-employed — Client: SCNT Studio — *Remote*

- Designed and built scnt.studio, a WooCommerce storefront for a perfume brand, end to end in one month: product catalog and variants, checkout flow, responsive theme and on-page SEO.

Software Engineering Intern — Jul 2024 – Aug 2024
Mediod Consulting — *Multan, Pakistan*

- Customized 4+ Odoo ERP modules in Python and XML views, automating workflows that cut manual data entry by 30%.

PROJECTS

The Negotiator — AI Voice Agents | *HackNation (International AI Hackathon), 2026*

- Voice agents call property dealers in Pakistan, extract itemized rent quotes from live conversation, compare bids and return a ranked report.
- Every figure carries a transcript citation (e.g. [Call 3, Line 41]) that traces it to the exact line of the exact call. Live: negotiator-frontend-iota.vercel.app

Feed-forward 3D Gaussian Splatting Benchmark | *Final-year project, 2026 – 2027 (in progress)*

- Benchmarks MVSplat, NoPoSplat and AnySplat on the same scenes and GPUs so reconstruction quality and compute cost are measured together, then tests pruning, compression and keyframe selection. Includes a web viewer and an Android capture app.

Walls Were Built to Fall | *Co-op roguelite FPS, Roblox, Luau, 2026 (launching soon)*

- Players hold a castle wall against a horde with towers, traps and 130 spell cards that evolve, mutate and combo. Every model is generated procedurally from Roblox primitives.

Interactive Portfolios | *JavaScript, Three.js, GLSL, 2025 – 2026*

- **Tetris:** each page is a Tetris board; a backtracking solver tiles the content into tetrominoes. One HTML file, no libraries. irfy2k.github.io/tetris
- **Lighthouse:** low-poly storm scene where projects are ships riding a vertex-shader sea; meshes and audio generated in code. irfy2k.github.io/lighthouse
- **Voxl:** walkable voxel park with custom GLSL shaders. voxl-portfolio.vercel.app

AWARDS

- **Runner-Up, FAST Speed Programming Competition** (Nov 2024) — placed 2nd of 100+ competitors on data structures, graphs and dynamic programming under a 3-hour limit.
- **Dean's List, FAST-NUCES** — 1st and 6th semesters.
